

My experience at Redemption College in the first term of SSS1

My name is Rahab Sunday. My experiences from the 9th of October 2012 to the 9th of November 2012 in this school are many. The first time I attended the school, I saw a lot of new behaviours from both the teachers and the students. We have many teachers and students who come from different places, tribes and states. The school has many buildings for class rooms, the principal's office and staff rooms. The school has many good teachers who are doing their best in teaching us the way we can understand. The school also has disciplined teachers and students, and the teachers are very friendly to each other. Also, the principal is a very qualified woman because she has the knowledge and skills needed in her line of work.

The next thing that makes me to be enjoying the school is that in the area of sport, the school is not left behind. We have good equipments for the sport activities and a well constructed field for football and other outdoor activities. The school is made up of four houses: the Red House (Diamond), the Green House (Olive), the Yellow House (Gold) and the Blue House (Orchard). Every Friday, there is time allocated for some activities such as the sport, labour and different club activities. So, I like the school.
